

# Are your vehicles fit for purpose?

Safety Campaign

# Are you taking responsibility?

---

Manage the risk associated with company drivers driving any vehicle for work purposes by introducing FSGB Driver Management.

The programmes fully integrated and continuous processes, once started, deliver on a consistent basis, satisfying not just health and safety and legal compliance requirements but also driver wellbeing and retention objectives.

Good communications are essential to ensure a smooth implementation. A digital comprehensive handbook which includes all relevant company policies is made available for live viewing as part of the driver registration process.

This ensures that all drivers, driving on company business:

- Feel supported and valued
- Are registered as authorised to drive, fully supported by the intuitive driver app
- Are continually reminded/prompted regarding work-related road safety responsibilities

By continually measuring the performance of the vehicle and the driver the FSGB Driver Management programme is able to intelligently analyse all relevant data collected. The live driver score, produced by the analytics, prompts an agreed intervention.

The nationwide FSGB Garage Network, supports the programme's Eyes & Ears campaign, which captures and records live images of components or situations where health and safety or legal issues have been identified.

**This brochure presents a number of those images and demonstrates the importance of ensuring that at all times drivers are not just aware of their responsibilities but are seen to be fully involved in the programme's compliance requirements.**

**Engage – Encourage – Support – Improve**

# Images captured by FSGB Garage Network as part of the Eyes & Ears Safety Initiative

---

**Example 1**

Brakes dangerously worn to excess and overheated.

**Example 2**

Brake pads worn to metal, vehicle continued to be driven until pad has fallen out and caliper has made contact with the brake disc.

**Example 3**

Brake disc worn and damaged due to vehicle being driven with metal-to-metal brakes.

**Example 4**

Removed brake pads and disc showing damage caused by metal to metal

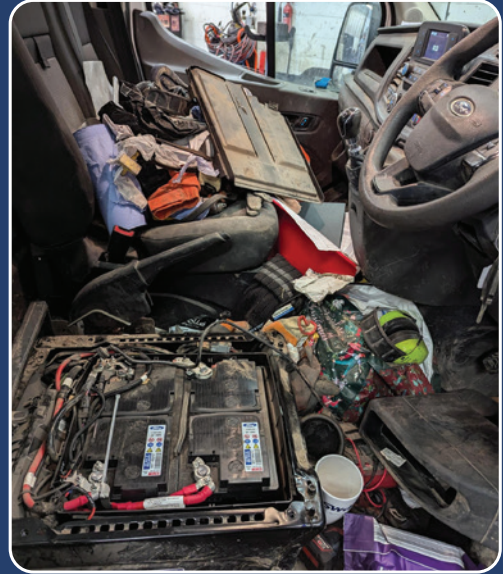

# Images captured by FSGB Garage Network as part of the Eyes & Ears Safety Initiative

---

## Example 5

Exhaust pipe damaged and bent following impact.

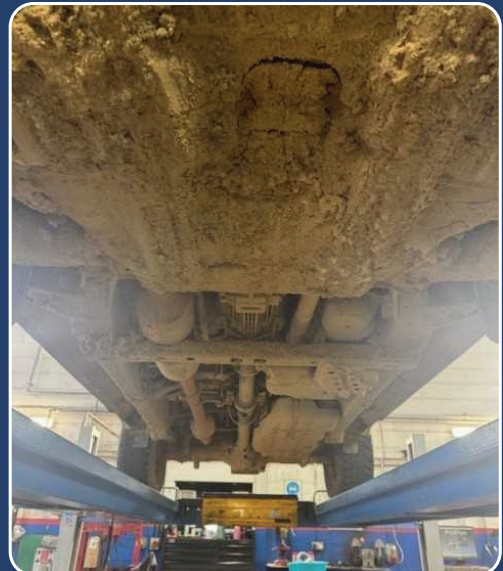

## Example 6

Interior of vehicle, dangerously untidy with loose objects, uncovered battery.

## Example 7

Company vehicle being used for the transport of carrots

## Example 8

Vehicle presented for service, garage unable to drain oil, or inspect due to vehicle being covered in mud.

# Are your drivers aware?

To deliver a successful work-related road safety programme it is essential that the driver, irrespective of the vehicles that they are driving when driving on company business, is fully engaged with all aspects of the programme's requirements.

FSGB Driver Management, as part of its implementation process, welcomes each driver, as follows:

**Engage** – by communicating to the driver all the areas of risk associated with work-related road safety and highlighting the considerable benefits resulting from full driver participation.

**Encourage** – the development of a continuous learning culture using the driver app, supported by classroom training, e-learning and in-vehicle coaching.

**Support** – by continuously measuring performance, by using dynamic analytics, timely and appropriate interventions are activated – all of which demonstrates to the driver the benefits of being part of the FSGB Driver Management programme.

**Improve** – upskill the driving ability by using performance analysis data, linked to bespoke and personalised training interventions – all designed to demonstrate that the very latest driver improvement processes are being utilised.

FSGB Driver Management is a genuine 24-7 work-related road safety support and development programme. Its continuous processes capture data from a variety of sources and by careful analysis, ensures total compliance with health and safety and legal requirements.

**The intuitive driver app supports a continuous communication link with company drivers by displaying prompts, reminders and other relevant communications, all designed to demonstrate and support the development of a company continuous learning culture.**

**Engage – Encourage – Support – Improve**
